**How Lock-N-Load® Works**

The Lock-N-Load® reloading system is a patented quick change bushing system that lets you change dies with a simple flick of the wrist. With Lock-N-Load® technology in your reloading press, you can stop loading, change dies, and start loading another caliber in SECONDS. If you load more than one caliber, Lock-N-Load® will dramatically speed up your reloading efforts.

This unique technology is featured on our Lock-N-Load® Classic™ and Lock-N-Load® AP™ (Auto Progressive) reloading presses, and other select loading tools.

---

**The Hornady Lock-N-Load® system is as easy as 1-2-3:**

1. Insert the Lock-N-Load® die bushing into the press bushing and lock it into place with a twist. The six locking lugs on the die and press bushings will hold it securely in position.
2. Insert your standard die into the Lock-N-Load® Bushing.
3. Adjust the die to the proper position and lock your setting into place with Hornady’s unique Sure-Loc™ lock ring.

To change calibers, simply twist the die counterclockwise, remove die and insert your next preset Lock-N-Load® die and bushing. Because they remain locked in their Lock-N-Load® Bushings, your dies will remain exactly as you set them. The positive locking action of the Lock-N-Load® Bushing holds the dies in rock solid, perfect alignment. Once you try Lock-N-Load® from Hornady, you’ll NEVER want to go back to your old system.

**SIX LOCKING LUGS**

The combination of the six lugs and the close tolerance of the tooling firmly grip the die bushing in place in the press for maximum rigidity and accuracy in reloading.

**RUBBER O-RING ON DIE BUSHINGS**

The O-ring on our die bushings gives you a better feel when the die is inserted and holds the die tight against the locking lugs to prevent accidental loosening.

*You can also convert another manufacturer’s press to the Lock-N-Load® system with Hornady conversion bushings.*
